

1 User Guide

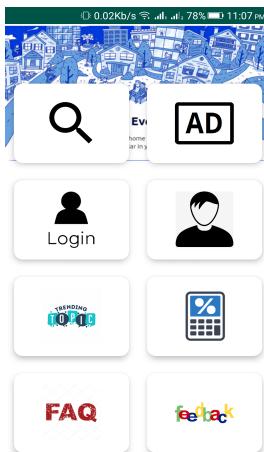

Finding a suitable apartment for living has become so tough nowadays in Bangladesh. On the other hand, who has an apartment and wants to let out or sell that apartment is also tough. Apartment Finder can help you to fix this problem. You can find an apartment of your own choice using this application by sitting home.

1.1 Launching the Application

To launch the application from your android phone, choose Apartment Finder.

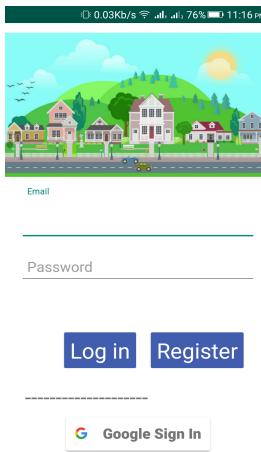

After launching the application your screen will look like this-

1.2 Using Log in

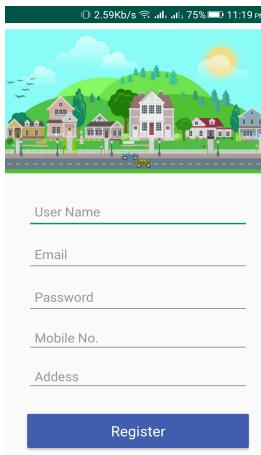

If you click on the "Log in" option -

There are two options.

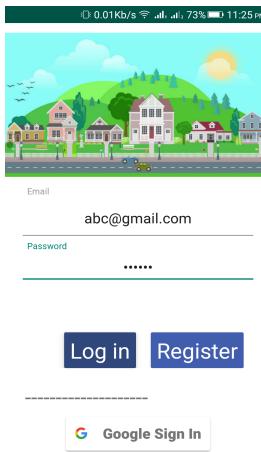

- Log in
- Register

If you are not a registered user click on "Register" button. You will find a page like this-

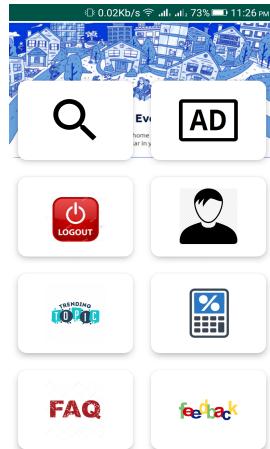

After filling all the field with appropriate information, click on "Register" button. You will be given an email in your email address. You need to check the email and click on the given link to complete the registration process.

Then again filling the email and password of your account, press the "Log in" button

your window will look like this-

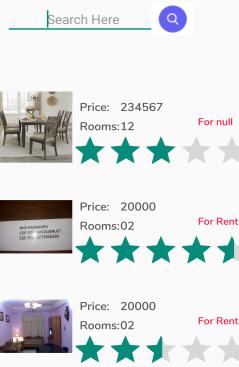

There will be a LOGOUT button for logging out.

1.3 Search for an Apartment

After clicking on "Search" button you will be given a text field in which you can write the location, where you are looking for an apartment.

725.30Kb/s 72% 11:28 pm

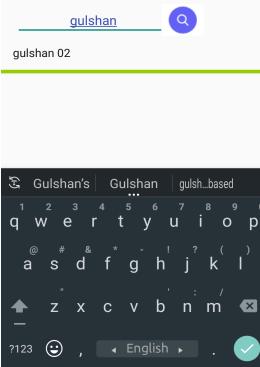

Search

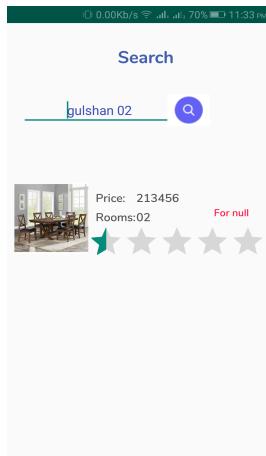

If there is any advertisement for that location like here in our example "gulshan 02" will be shown. After clicking on that location you can see the apartments in that place and to look more, you have to choose one.

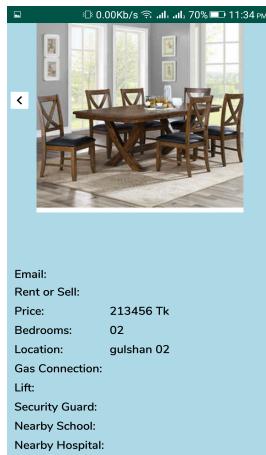

0.53Kb/s 71% 11:30 pm

Search

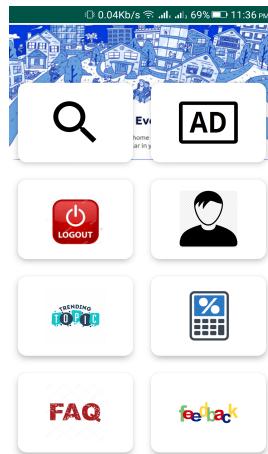

If you click on any advertisement, details will be shown.

Here you can make a contact with the house owner, report this advertisement etc.

1.4 Make an Advertisement

If you want to post an advertisement, click on "AD" button-

Here you will find a validation form.
